

Washington Business Week 2022 Telemedicine & Healthcare

Gain unique experience in the Healthcare industry with Washington Business Week in 2022!

Creativity—Analysis—Inspiration—Development—Teamwork—Success

What To Expect

Guided by a mentor, students will work as a team to manage a mock medical clinic and develop new technologies that will assist in the delivery of Telehealth services. Students will also have an opportunity to interact with Swedish Medical Center Residents and doctors who are experts in their field. Further, students will explore careers, build a network with professionals and future leaders, all while earning two college credits!

Students attend from all over Washington, our nation, and the world. We are excited to learn from one another in this unique and diverse camp as we explore the subject of Telehealth and the future of the health industry.

I had a great learning experience primarily from the speakers (who) provided many concepts that I think are very valuable both short-term and long-term. One great takeaway is how failure is one of the only ways to learn and to try, diagnose, and try again.
